11080002	Cimarron	NM-2305.1.B_10	Springer Lake	5/5C	329.44	ACRES	20.6.4.317	Mercury - Fish Consumption Advisory	5/5C	303(d) List (no TMDL in place)		2004	Fish Consumption Advisory listings are based on NM's current fish consumption advisories for this water body. Per USEPA guidance, these advisories demonstrate non-attainment of CWA goals stating that all waters should be "fishable". Therefore, the impaired designated use is the associated aquatic life even though human consumption of the fish is the actual concern.

13020101	Upper Rio Grande	NM-2120.A_710	Red River (Placer Creek to East Fork Red River)	5/5C	6.01	MILES	20.6.4.123	Benthic Macroinvertebrates	5/5C	303(d) List (no TMDL in place)	2020			
13020101	Upper Rio Grande	NM-2119_10	Red River (Rio Grande to Placer Creek)	5/5A	21.16	MILES	20.6.4.122	Turbidity	5/5A	303(d) List (no TMDL in place)	2021	TMDL for dissolved aluminum 2006 (withdrawn in 2013 because dissolved aluminum criteria no longer apply).	This AU is listed for chronic total recoverable aluminum with a commitment to reassess for the draft 2022 Integrated List. Most recently available assessable data (2019-2020) obtained from the Questa Mine Site (collected by Arcadis U.S. and submitted to SWQB by GWQB staff in 2021) indicates full support for total aluminum with no exceedances (0/4) of total aluminum chronic or acute criteria from furthest downstream site in the AU (only station with enough new data to assess). The 2020 Assessment Rationale notes the continuing downward trend in the total recoverable aluminum concentrations at certain water quality stations from 2014 to 2020, and that water quality appears to be improving based on the most recent available data. The existing aluminum impairment will be removed. Turbidity data not available to re-assess.

Season-long thermograph deployments during the 2017-2018 survey resulted in exceedances of both the 6T3 and Max Temp criteria. Temperature impairment was erroneously missed in the 2020-2022 List. Temperature added as a cause of non-support for the 2022-2024 List.
13020101	Upper Rio Grande	NM-2111_10	Rio Grande (Ohkay Owingeh bnd to Embudo Creek)	5/SC	14.07	MILES	20.6.4.114	Turbidity	4A	TMDL Completed	06/02/2005	1998	TMDL for turbidity. Fish Tissue Advisory listings are based on NM's current fish consumption advisories for this water body. Per USEPA guidance, these advisories demonstrate non-attainment of CWA goals stating that all waters should be "fishable". Therefore, the impaired designated use is the associated aquatic life even though human consumption of the fish is the actual concern.	Season-long thermograph deployments during the 2017-2018 survey resulted in exceedances of both the 6T3 and Max Temp criteria. Temperature impairment was erroneously missed in the 2020-2022 List. 													Some of the impairment listings are based solely on stormwater data. Procedures are in place, under the purview of the Buckman Direct Diversion Board, that are intended to not allow public water supply withdrawal from the Buckman Diversion during significant storm events. Fish Tissue Advisory listings are based on NM's current fish consumption advisories for this water body. Per USEPA guidance, these advisories demonstrate non-attainment of CWA goals stating that all waters should be "fishable". Therefore, the impaired designated use is the associated aquatic life even though human consumption of the fish is the actual concern.

13020211	Elephant Butte Reservoir	NM-2104_00	Elephant Butte Reservoir	5/5C	10908.5	ACRES	20.6.4.104	Mercury - Fish Consumption Advisory	5/5C	303(d) List (no TMDL in place)		2004	Fish Consumption Advisory listings are based on NM's current fish consumption advisories for this water body. Per USEPA guidance, these advisories demonstrate non-attainment of CWA goals stating that all waters should be "fishable." Therefore, the impaired designated use is the associated aquatic life even though human consumption of the fish is the actual concern. Land management agencies have posted contact recreation warnings due to toxic blue green algae. SWQB does not have water quality standards or assessment procedures related to blue green algae at this time. The actual size of this AU at any given time depends on fluctuating surface area and reservoir volume. The noted acreage is from the USGS NHD 2014 GIS layer. The potential inundation area is almost 40,000 acres.	Monitored during Lower Rio Grande survey 2019-2020. No changes.
13020211	Elephant Butte Reservoir	NM-2104_00	Elephant Butte Reservoir	5/5C	10908.5	ACRES	20.6.4.104	PCBS - Fish Consumption Advisory	5/5C	303(d) List (no TMDL in place)		2010	Fish Consumption Advisory listings are based on NM's current fish consumption advisories for this water body. Per USEPA guidance, these advisories demonstrate non-attainment of CWA goals stating that all waters should be "fishable." Therefore, the impaired designated use is the associated aquatic life even though human consumption of the fish is the actual concern. Land management agencies have posted contact recreation warnings due to toxic blue green algae.
